

## Protective Packaging Guide

The protective packaging guide is shown throughout our catalogue to help you choose the right packaging product. The functions highlighted on the side of the box ensure you're getting the product that will meet your packaging needs.

# FOAMplus<sup>®</sup> by STOROpack

## Save and Sound

- FOAMplus<sup>®</sup> ensures that your customer receives an undamaged product in clean, tidy packaging.
- FOAMplus<sup>®</sup> is versatile: Because it can be used in so many ways, it allows flexibility in any packaging process. FOAMplus<sup>®</sup> offers a range of foams with different densities for any packaging challenge.
- FOAMplus<sup>®</sup> adapts perfectly: You can use direct foaming or foam-filled bags, always confident that FOAMplus<sup>®</sup> will mould around the product, protecting it like a shell.
- FOAMplus<sup>®</sup> offers outstanding protection: The foam sets to an impact-resistant cushion, holding the product securely and keeping it safe.
- FOAMplus<sup>®</sup> saves space: Foam cushions are produced as required giving you maximum yield from minimum footprint. The systems are extremely compact. A unit with two 200-litre drums can produce up to 90 cubic metres of expanded foam.
- FOAMplus<sup>®</sup> keeps the cost of transportation to a minimum: Foamplus provides high protection whilst being very lightweight.

# Custom made Packaging for your Products

FOAMplus® from Storopack is a unique packaging solution which forms a perfect fit around any product irrespective of size, weight or fragility. The FOAMplus® moulded cushions are produced on demand at the packing station and form to the shape of the product. The cushion is extremely impact-resistant and lightweight, providing a high-grade, custom-fit protective barrier for your product.

## FOAMplus® Handpacker: The direct-foam system

The Handpacker is manually operated, with fully electronic microprocessor control to maintain consistent quality. Its performance capability makes FOAMplus® amongst the fastest foam-packaging systems. It speeds up the packing process without sacrificing packaging quality.

The self-diagnosing software in the FOAMplus® system keeps everything working smoothly and effectively. The foam gun is self-cleaning and delivers packaging foam of the very highest quality.

## FOAMplus® Bagpacker: The foam-in-bag system

It's fast, easy, and efficient. The machine can fill up to 23 liner bags a minute at the touch of a button. Bag size and degree of fill are easy to set for each individual application and simple to change when necessary.

They provide economical, efficient and secure protection for products of virtually any size, shape or weight. The FOAMplus® controller is easy to use and has a built-in programmable timer that will store settings for up to six different bag sizes and degrees of fill. This built-in efficiency is designed to cut out waste and simplify operator training. The self-cleaning gun and the robust design help to keep maintenance costs to a minimum.
